To start a decoupage craft, cut out your graphic elements. Spread some glue onto the canvas board and stick the cutouts on the board. Allow the glue to dry. ### **Psychosocial Support Service Cell (PSS Cell) :**

The counselor can use strategies to establish a good rapport with contacts and increase their motivation to change in terms of protective behaviors and providing home-based care. Counseling should not be conducted in silos, and it should not be very structured because no two persons are identical. A client-centered approach should be used to address each person's needs individually.

Successful counselling aims to enhance the client's coping skills by bringing change in the decision making and behaviour changes specific to the crisis like the COVID-19 pandemic.
